Project Design Industrial- Building Construction
1st semester 2015/2016

CONSTRUCTION TASK 1

Description of the 1st Construction design task

Based on their accepted architectural concept students have to define main structural elements and system of their building on the

- ground level floor plan m=1:200
- 1 representative section m=1:200
- 1 frequented all elevation m=1:200

Students have to document at least one catalogue example for their structural concept, applied constructions.

Formal requirements

All drawings can be traditional hand- or CAD drawings or any other optional official scaled printed technique on A/3 sheets. The clear and correct technical presentation is important.
The name of the author has to be marked on each plan, cover.

Submission date

9th October is deadline of submission. Mid-term structural documentations will be evaluated for the next workshop on 13th October to help the further progress of students work.

2nd October 2015.
